

REQUEST FOR ACKNOWLEDGEMENT

INSTITUTION AUTHORIZING AGENCY: PERUVIAN ENGINEERS ASSOCIATION COLEGIO DE INGENIEROS DEL PERU

The Peruvian Engineers Association (Colegio de Ingenieros del Peru CIP) is the only non-governmental entity authorized by law to undertake the assessment, registering and licensing of Professional Engineers for practicing engineering in the country, as well as for representing, defending, norming, administering and overseeing the development and practice of engineering.

In Peru, it is a statutory requirement to be registered and licensed in order to engage in the regulated practice of engineering. To remain licensed, registered engineers must practice engineering within the regulatory standards and norms established by the Peruvian Engineers Association.

The Peruvian Engineers Association was created by Congress Law in year 1962. It is an active member of the World Federation of Engineering Organizations WFEO, and a member of the APEC Engineer Agreement of the International Engineering Alliance IEA.
